## PROJECTS

Apr 2024 – Jul 2024

◆ Farmer Trading System

The "Farm Management System Project" is an innovative endeavor aimed at transforming agricultural paradigms by creating an easy-to-use, effective computerized system. The project's primary goal is to provide a smoothly integrated platform that guarantees precision and adaptability in farm management procedures while also eliminating redundant data. The Frontend uses - HTML, CSS, JavaScript, Bootstrap. Backend - Python flask (Python 3.7), SQL Alchemy.

May 2024 – Jul 2024

◆ Online Rental Manage System

PG Life is an innovative online platform that facilitates the process of finding and booking paying guest (PG) accommodations. Aimed at students and young professionals, PG Life provides a comprehensive database of PG properties, each with detailed descriptions, amenities, images, pricing, and location specifics. Implemented using HTML, CSS, JavaScript, Bootstrap , PHP , MySQL.

Aug 2024 – Oct 2024

◆ Tour service management

Tour Service Management is a web page to list out the tourist places and you can contact us to provide a tour service
